

PARAGON

state of the art precision...

Paragon Pressings, formed in 1987, has developed into the Sheet Metal Division of Paragon Precision Ltd, recognised as one of the leading producers of precision sheet metal work, designing and manufacturing a wide range of highly accurate components, fittings, special brackets, enclosures, equipment cases, computer chassis and precision fabricated products.

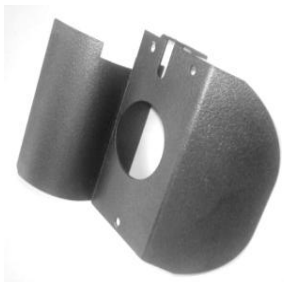

Our experienced design and programming staff, utilising the latest software tools, are able to help create a new component / assembly or modify your existing design for optimum performance at minimum manufacturing cost.

We have the latest Amada sheet metal processing equipment available, including 7 axis HFP press brakes, high accuracy EML 4kw combined laser and high speed punching cell with 3 metre automatic sheet handling and lights out operation.

With the added capability of our finishing facilities; robotic MIG / TIG welding and a state of the art fully automated Nordson powder coating plant, in-house assembly and packing facilities, and any required tooling supplied by our own Tooling Division, we provide a one stop solution for your manufacturing requirements.
